

### Who we are...

*One Hospitality System Inc.* was founded in 2006 by Hospitality Industry Professionals who wanted to deliver a solution to the Hospitality Market that met the seamless functionality needs of today's Hotels and Resorts. Using the latest in technology tools we succeeded in making it easy-to-use, install, train and support.

### The Founder

**Aurelio DaMota** – Vice President, Sales and Marketing, is a graduate of Centennial College in Toronto in Hospitality Management. Aurelio's career started in 1978. His 29 year hospitality tenure has taken him through Hilton International, Ramada, Sheraton and many other independent hotels. Aurelio also sold Hospitality systems for Hotel Information Systems (HIS), Computerized Lodging Systems (CLS), GEAC, MAI Canada Ltd and ENABLEZ. Aurelio has also been an active participant in HFTP for over 15 years.

## Our Application

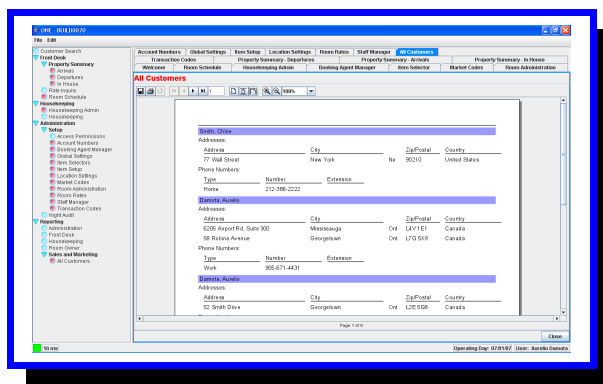

*One* is a complete application to manage every area of your operation. Designed as a modern application, *One*, can be deployed locally at your Hotel or remotely hosted through the Internet from anywhere in North America.

*One* was designed using the most modern tools to ensure infinite security, un-interrupted operations, feature rich functionality and simplicity in use and staff training.

*One* will manage your staff, guests, food and beverage operations, accounting, sales, and in the very near future, all your recreational facilities such as Golf, Spa, Retail, and much more.

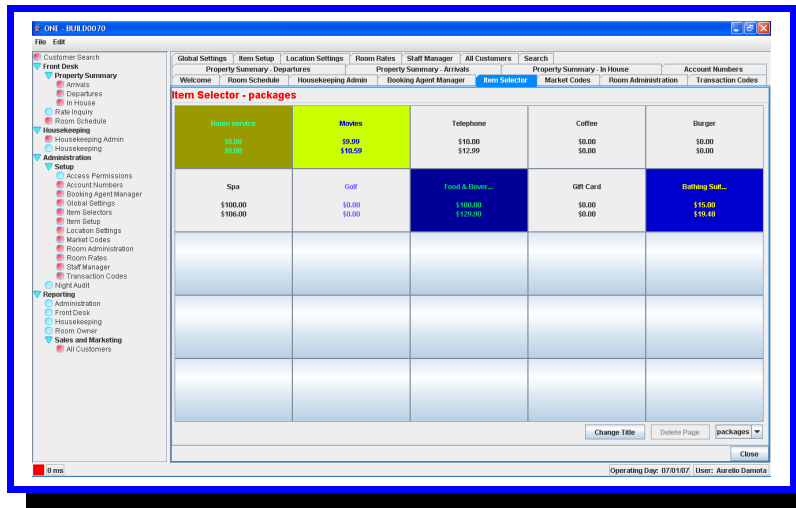

## Reporting

One's reporting tools provides management with quick and accurate retrieval of operational information to the user's screen, local or network printers.

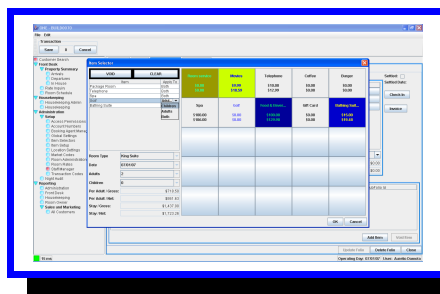

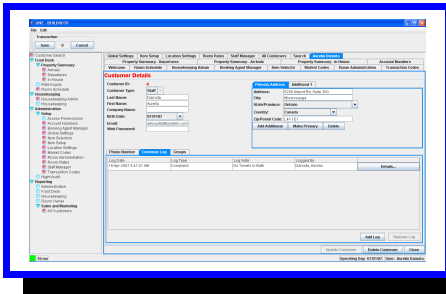

One Hospitality System Inc.

## Item Look – Up

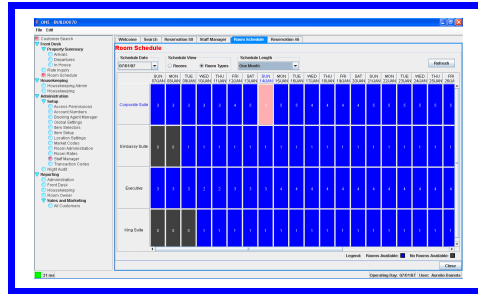

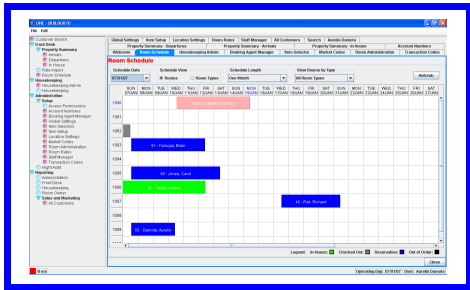

One's Item Look-up is an easy to use, Touch screen enabled system that can easily manage, Retail and Food and Beverage, Point of Sale as well as create "packages on the fly"

## Customer Detail

Our customer search design allows the user to enter a large array of client information including, multiple hierarchy of mailing addresses, timeshare ownership information, history of reservation and business value along with automated office tools for customer logs and follow-up information. A detailed history of customer data is infinitely maintained in One without the need to archive.

## Room Summary

Our Tape chart room summary enables management and staff to view reservations and room blocks in real time by various views such as date, room type and even individual rooms. *ONE* allows the end user to "drill down" into the client reservation and guest data for increased customer service.

More, Much More....

### Benefits

*One's* modern design will empower Hotels to maximize their use of guest data with powerful marketing features such as marketing budget comparisons, revenue projections, "up selling tools" and much more. Employing Oracle as our database engine, your operation will benefit from the power and security of one of the world's most reliable applications.

There is much more to *One Hospitality System*. Call us today to see if we are the *One* for your hotel or resort.
